

MAINTENANCE & UPDATES

Maintaining and improving our platform is crucial to ensure its long-term success and usability. After deployment, we focused on continuous monitoring, collecting user feedback, and implementing updates to enhance the overall experience.

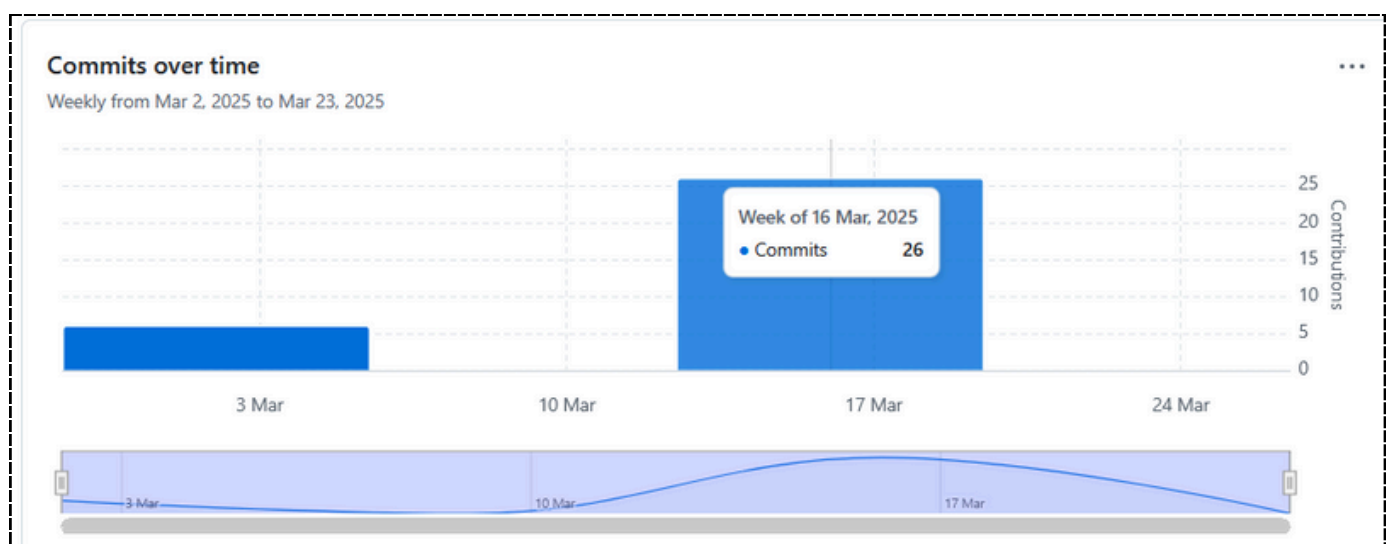

✓ Steps We Followed:

Bug Tracking:

Regularly monitored the project for any bugs or errors reported by users.

User Feedback:

Collected feedback from hostellers to understand their needs and improve the platform accordingly.

New changes & bug fixes

Continuous Improvement:

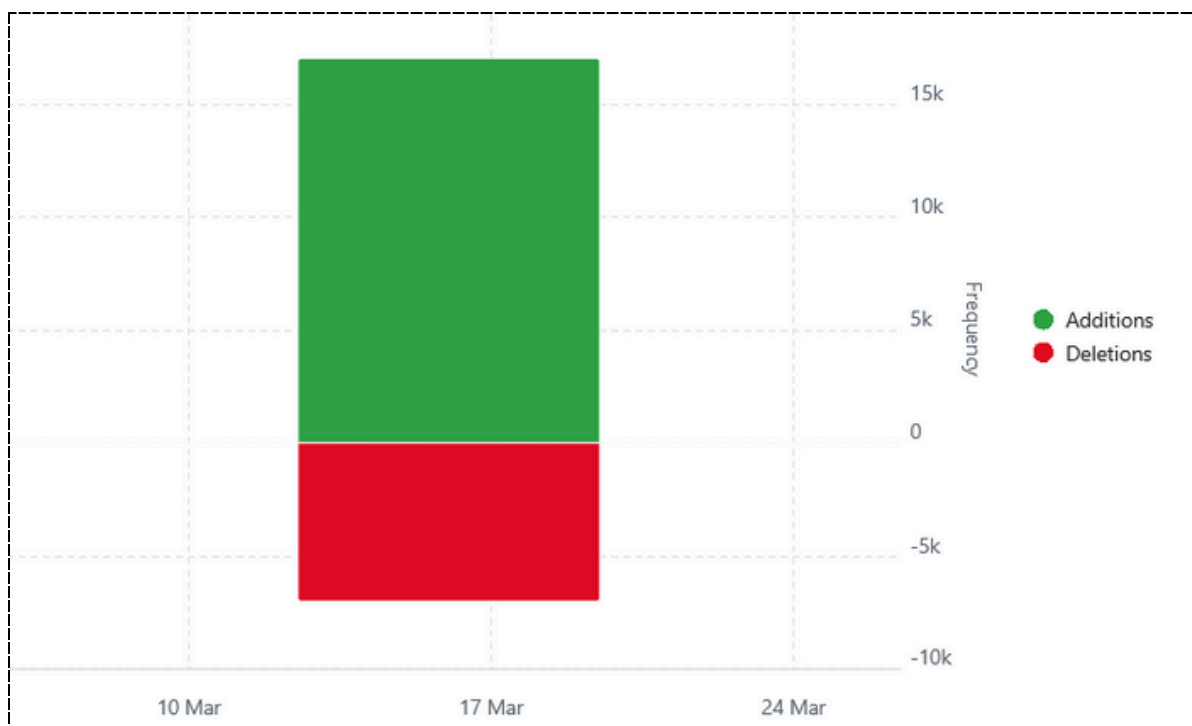

Added new features based on user suggestions and optimized the code for better performance.

Version Control:

Used GitHub to track changes, making it easy to collaborate and roll back if needed.

Future Enhancements:

Planned to introduce more categories, better search filters, and push notifications for real-time updates.

Adding New Features
